**Marriages :—OCT., NOV., DEC., 1919.**

**Births and Deaths.—JAN., FEB., MARCH, 1920.**

During the quarter ended 31st March last, there were registered in the 829 Registrars' Districts in Ireland 26,681 births—a number equal to an annual birth-rate of 23·9 in every 1,000 of the estimated population.\* There were 18,882 deaths during the quarter, representing an annual rate of 16·9 per 1,000.

In the same period (according to the returns obtained by the Royal Irish Constabulary and the Dublin Metropolitan Police who acted as enumerators at the several Irish seaports), 1,415 persons emigrated.

In England and Wales last quarter the births registered numbered 271,082, and the deaths 137,637, the corresponding numbers for the first quarter of 1919, being 144,920 and 191,922.

The birth-rate in Ireland for the quarter is 1·7 above the average rate for the corresponding quarter of the ten years, 1910–1919, and 3·9 above the rate for the first quarter of 1919. The deaths are 9,247 below those registered in the corresponding quarter of 1919 ; the death-rate is 8·8 below the rate for that quarter, and 4·3 below the average for the first quarter of the ten years, 1910–1919.

In comparison with those for the corresponding quarter of 1919, the returns of pauperism furnished by the Local Government Board show an increase of 320 in the average number of Workhouse inmates on Saturdays during the quarter, and an increase of 784 in the average number of persons on out-door relief.

\* See page 14.

The annual rate (6·1 per 1,000 of the population) represented by the marriages registered during the fourth quarter of 1919 is 1·2 above the average rate for the corresponding quarter of the preceding ten years.

\* The rates for the total of Ireland (and for the county boroughs of Dublin and Belfast and Londonderry Co. and Co. Borough) are calculated on the estimated population in the middle of the year 1920; those for the provinces and remaining counties on the population according to the Census of 1911.

## MARRIAGES.

The Marriages (6,718) registered in Ireland during the fourth quarter of 1919 are equivalent to an annual rate of 6·1 per 1,000 of the estimated population, being 1·5 above the rate for the corresponding quarter of 1918, and 1·2 above the average rate for the fourth quarter of the ten years, 1909-1918. Of the total number of marriages, 4,519 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 2,199 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 5·6 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 7·7 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 1·1 above, and that under the latter heading 1·7 above the average rate for the corresponding quarter of the previous ten years.

Of 26,977 marriages during the year 1919, there were registered in the first quarter, 6,414; in the second, 6,599; in the third, 7,246; and in the fourth, 6,718.

TABLE II.—Showing by QUARTERLY PERIODS the MARRIAGES registered in Ireland in each of the eleven years, 1909–1919, and the average number for the ten years 1909–1918.

## BIRTHS.

The number of births registered during the quarter ended 31st March last was 26,681—13,811 boys and 12,870 girls—being equal to an annual ratio of 1 in every 41.9 or 23.9 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years, 1910–19, was 24,278, equivalent to an annual rate of 22.2 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces\* last quarter are—Leinster, 25.0 per 1,000 of the population according to the Census of 1911; Munster, 23.0; Ulster, 26.4; and Connaught, 19.9.

## DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st March last was 18,882—9,454 males and 9,428 females—affording an annual ratio of 1 in every 59.2 or 16.9 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years, 1910–19, was 21.2 per 1,000.

The death-rate in Leinster was 18.0 per 1,000 of the population according to the Census of 1911; in Munster, 15.1; in Ulster, 19.3; and in Connaught, 13.9.

\* See note (\*) on page 2.

TABLE III.—Showing by QUARTERLY PERIODS the number of BIRTHS and DEATHS registered in Ireland in each of the ten years 1910–1919, and the average number for that period ; also the number registered during the first quarter of the year 1920 :—

AGES.—Of the 18,882 deaths registered last quarter, 2,400, or 12.7 per cent., were of infants under one year of age ; and 7,640, or 40.5 per cent., were of persons aged 65 years and upwards. The deaths of infants under one year old are equal to 90.0 per 1,000 of the births registered. In the Province of Leinster the number of deaths of infants under one year old equalled 14.0 per cent. of the total deaths registered therein ; in Munster, 11.2 per cent. ; in Ulster, 14.0 per cent. ; and in Connaught, 8.0 per cent. The deaths of persons 65 years old and upwards registered during the quarter in Leinster are equal to 37.1 per cent. ; in Munster to 43.6 per cent. ; in Ulster, to 36.7 per cent. ; and in Connaught to 56.4 per cent. of the total deaths registered in the province.

CAUSES OF DEATH.

As may be seen from the following Table the total number of deaths from the principal epidemic diseases is 974, and is equivalent to an annual rate of 0.87 per 1,000 living, being 175 (or 0.14 per 1,000) above the average for the first quarter of the five years preceding.

TABLE IV.—Showing the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 31st March, 1920, and in each of the eight quarters immediately preceding ; with the averages for the first quarter of the five years, 1915–1919, and the corresponding annual rates per 1,000 of the population, represented by the deaths from these causes, during the periods above referred to.

**ENTERIC FEVER.**—There were 54 deaths registered during the quarter, as compared with 39, 37 and 55 in the three preceding quarterly periods, and the average for the five years, 1915–1919, which was 55. Of the 54 deaths, 16 belonged to Belfast County Borough, 6 were registered in Listowel Union, 3 in Waterford, and 2 in each of the following Unions:—Carrick-on-Suir, Castleblayney, Dublin, Limerick, Monaghan and Omagh.

**TYPHUS.**—Three deaths were registered from Typhus, all occurring in the union of Omagh.

**SMALL-POX.**—There was no record of mortality from Small-pox in Ireland.

**MEASLES.**—The deaths from Measles, in number 208, represent a rate of 0·19 per 1,000 of the estimated population of Ireland; in the three preceding quarters, the deaths numbered 29, 23, and 145 respectively. Of the total deaths, 131 occurred in Belfast Union, 26 in Dublin, 18 in Newry, 6 in each of Coleraine and Rathdown, 4 in each of Lisburn and Lurgan, 3 in Larne, 2 in Downpatrick and 2 in Letterkenny. The total deaths exceeded the average for the preceding five years by 45.

**SCARLET FEVER.**—The fatalities from Scarlet Fever amounted to 129, having declined from 166 in the December quarter of 1919, but are in excess of the deaths in the June and September quarters of that year, which were 19 and 45 respectively. The deaths in the period under notice are in excess of the average by 76. The total deaths (129) include 27 in Belfast Union, 25 in Lisburn (23 of these appertained to Belfast County Borough), 10 in Newtownards, 8 in Dublin, 5 in each of the unions of Donegal, Dungannon and Omagh, 4 in each of Downpatrick, Limavady and Tuam, and 2 in each of the following unions:—Ballycastle, Ballymena, Ballymoney, Bawnboy, Larne, and Rathfriland.

**WHOOPING-COUGH.**—Deaths from Whooping-cough, which numbered 107 in the June quarter of 1919, declined to 61 in the September quarter, rose again to 90 in the December quarter and again in the March quarter of 1920 to 279; this number exceeds the average by 48, and is represented by a rate of 0·25 per 1,000 of the population of Ireland estimated to the middle of 1920. Of the deaths, there were 60 in Dublin union, 42 in Belfast, 31 in Cork, 24 in Waterford, 9 in Cookstown, 8 in Enniscorthy, 7 in each of Castleblayney and Galway, and 5 in each of Cahersiveen, Sligo, and Strokestown unions. (See Abstract IV.).

**DIPHTHERIA.**—In each of the second and third quarters of 1919, deaths from Diphtheria were 41. In December quarter the deaths increased to 114, and in the period under notice again increased to 133, the average for the preceding five years being 75. The total deaths, 133, are equal to an annual rate of 0·12 per 1,000. Of the total deaths, 18 were registered in Dublin, 11 in Cork, 9 in Limerick and 7 in Londonderry. There were 9 deaths in the union of Inishowen, 9 in Lisburn (8 belonging to Belfast County Borough) and 3 in Belfast union, 4 in Thomastown, 4 in Westport, and 3 each in Ballina, Birr, Gorey, Larne and Oldcastle Unions.

**DIARRHŒAL DISEASES.**—Of the total, 168, 9 were caused by dysentery, and 136 were deaths from diarrhœa and enteritis of children under two years of age. In the three preceding quarters, deaths from diarrhœal diseases, including deaths from dysentery were 155, 513 and 288 respectively.

**INFLUENZA.**—The deaths attributed to Influenza numbered 288, and are equal to an annual rate of 0·26 per 1,000. Among the deaths, 126 occurred in Belfast union, 28 in Dublin, 12 in Newtownards, 8 in Cookstown, 8 in Lurgan, 6 in Antrim, 5 in Coleraine, 5 in Urlingford, and 4 in each of the unions—Castleblayney, Downpatrick, Kanturk, Larne, and Naas.

**TUBERCULOSIS.**—Deaths from Tuberculosis, all forms, which were 2,523, 1,832 and 1,671 in each of the three quarters preceding, rose to 2,023 in the period under notice, as compared with an average of 2,492 for the first quarter of the five years, 1915–19; the 2,023 deaths correspond to an annual rate of 1·81 per 1,000 of the population of Ireland estimated to the middle of the year 1920.

**CANCER.**—The deaths attributed to malignant disease numbered 848, as compared with the average 883, and are represented by an annual rate of 0·76 per 1,000 of the estimated population of Ireland.

**VIOLENCE.**—The deaths attributed to Violence numbered 246 as compared with 224 in the December quarter of 1919, the average for the first quarter of the five years, 1915-19, being 272.

#### INQUESTS.

There were 307 inquests reported to the Registrars during the quarter, this number being equal to one in every 62 of the total deaths registered.

In Leinster there was one inquest to every 61 deaths registered, in Munster one to 65, in Ulster one to 56, and in Connaught one to 89.

#### DEATHS IN PUBLIC INSTITUTIONS.

Of the 18,882 deaths registered, 3,943, or 20·9 per cent., occurred in public institutions. In Leinster the percentage was 28·6, in Munster 23·6, in Ulster 16·8, and in Connaught 11·7.

#### UNCERTIFIED DEATHS.

According to the returns, 4,300 of the 18,882 deaths registered during the quarter were uncertified, being 23 per cent. of the total. In Leinster the percentage was 16, in Munster 27, in Ulster 17, and in Connaught the uncertified deaths were 52 per cent. of the total deaths registered in the province.

#### URBAN DISTRICTS.

##### THE QUARTER.

Table V. gives separate statistics for the Urban Districts. It will be observed that the birth-rate last quarter for these districts, which contain nearly one-third of the total population of the country, was 32·2 per 1,000 of the population, the rates for the three preceding quarters being 23·6, 23·7, and 27·9, respectively, and the average rate for the 5 years, 1915-19, being 23·8. In the remainder of the country the birth rate was 20·5 per 1,000, as against 20·4, 17·5, and 17·2, respectively, in the three preceding quarters, and an average rate for the corresponding quarter of the previous five years of 19·5.

The annual rate represented by the deaths from all causes for the Urban Districts during the quarter was 20·2 per 1,000, as compared with 17·7, 13·0, and 17·2, respectively, for the last three quarters, and an average of 23·5 for the first quarter of the five years, 1915-19. In the remainder of the country the death-rate for the quarter was 15·8, the respective rates for the three preceding quarters being 19·6, 12·3, and 13·3, per 1,000, and the average rate for the five years, 1915-19, being 20·2.

For the principal epidemic diseases\* in the several Urban Districts the annual rate represented by the deaths from them during the quarter under review was 1·6 per 1,000 of the population. In the remainder of the country it was 0·5.

\* See note (†) on page 7.

NOTE.—“The Dublin Registration Area,” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the eighteen Urban Districts marked thus (\*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 3rd April, 1920.

REGISTRATION, FIRST QUARTER 1920.

† Enteric fever, typhus, small-pox, measles, scarlet fever, whooping-cough, diphtheria, dysentery and diarrhoeal diseases.  
‡ The rates for the Dublin Registration Area and its component parts and for Belfast and Londonderry are calculated on the estimated population in the middle of 1920.  
‡ (a) Including two deaths from cerebro-spinal fever.

\* Enteric fever typhus small-pox measles scarlet fever whooping-cough diphtheria dysentery and diarrhoeal diseases.

† The rates for the Dublin Registration Area and its suburbs, including two deaths from cerebro-spinal fever.

(a) Including 13 deaths from enteric fever, 3 from measles, 23 from scarlet fever, 7 from diphtheria, 1 from influenza, and 16 from tuberculous disease, admitted from the City of Belfast institutions situated in the Registrar's District of Ballylesson, in the Union of Lisburn, and one death from cerebro-spinal fever registered in Belfast.

VACCINATION.

According to the Returns of Primary Vaccinations received for the first quarter of the year 1920, there were 11,073 persons successfully vaccinated.

EMIGRATION.

The Returns obtained by the Royal Irish Constabulary and the Dublin Metropolitan Police, who acted as enumerators at the several Irish seaports, show that the number of emigrants who left Ireland during the quarter ended 31st March last was 1,415 (599 males and 816 females), being 1,036 more than in the corresponding quarter of the year 1919, but 730 below the average number for the first quarter of the ten years 1910–1919.

TABLE VI.—EMIGRATION from IRELAND during the months of January, February and March, in 1919 and 1920 :—

MONTHS	NUMBER OF EMIGRANTS.

PRICES AND PAUPERISM.

The price of the 4-lb. loaf in Dublin for last quarter was 10*d.* for bread delivered. In the first quarter of the year 1919 the average price, derived from returns furnished by Messrs. Boland (Limited), and by Messrs. Johnston, Mooney and O'Brien (Limited), was 9½*d.* and in the corresponding quarter of 1910 it was 6½*d.*

The average price of oatmeal (1st quality) in Dublin for the quarter was 36*s.* 0*d.* per cwt. For the first quarter of the year 1919 the average price was also 36*s.* 0*d.*, and for the first quarter of 1910 the average price was 14*s.* 6*d.* per cwt.

The average price per cwt. of potatoes at the Dublin Potato Market for the quarter was 10*s.* 6*d.* In the first quarter of 1919 the average price was 6*s.* 9½*d.*, and the price for the corresponding quarter of 1910 was 3*s.* 0¼*d.*

The average price per cwt. of beef at the Dublin Cattle Market was 150*s.*, as against 140*s.* 6*d.* for the first quarter of 1919, the price for the first quarter of 1910 being 59*s.*

The price (including cartage) of best Whitehaven coal in the City of Dublin was 58*s.* per ton net.

The highest price of Consols at the Dublin Stock Exchange for the quarter was £51 <sup>11</sup>/<sub>16</sub>, and the lowest £45 <sup>7</sup>/<sub>8</sub>.

The minimum annual rate of discount charged on Irish Bills at the Bank of Ireland during the quarter was raised from 6 per cent. to 6½ per cent on 18th March.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average weekly number of persons receiving out-door relief during the quarter was 36,173, or 784 above the average for the first quarter of 1919, the persons receiving indoor relief numbering 27,023, being 320 above the average number for the preceding year.

Of the persons receiving in-door relief during the first quarter of 1920, an average number of 1,443 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1919 the average weekly number was 1,414.

TABLE VII.—Showing the AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during the quarter (13 weeks) ended 3rd April, 1920, with the average for the first quarter of the previous ten years, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR AND OUT-DOOR RELIEF.

PERIOD.	Average PRICES OF PROVISIONS.					PAUPERISM.

NOTE.—The average prices of Oatmeal, Potatoes, and Beef given in the above Table have been kindly supplied by the Department of Agriculture and Technical Instruction for Ireland; the number of persons receiving In-door and Outdoor Relief by the Local Government Board; and the prices of bread by (a) Messrs. Bolands (Limited), and (b) Messrs. Johnston, Mooney, and O'Brien (Limited).

## METEOROLOGY\*

### JANUARY.

Weather of an oceanic or south-westerly type prevailed during the greater part of January. Depressions, which were often of great size and intensity swept past the western shores of Ireland in rapid succession, and very commonly travelled on a north-easterly course, so that winds from westerly or south-westerly points pre-

\* Furnished by the Director of the Meteorological Office. For further information the reader is referred to the Monthly Weather Report (price 6d., post free 7d.) and other publications of the Meteorological Office. Maps illustrating the distribution of rainfall, pressure, temperature and sunshine are given in the Monthly Weather Report. The normal values for each month, mostly based on 35 years' observations, are shown in "The Book of Normals of Meteorological Elements for the British Isles." (M.O. 236, Section I., 1919, Price 2s. net.).

dominated, with the result that the general character of the month was mild, wet, and windy. An unusually severe gale passed across Ireland on the 27th, and considerable damage was done to the quays and wharves at Queenstown Harbour.

TEMPERATURE.\*—The mean temperature for the month was 0·5*a* above the normal in the northern half of the country, and 0·7*a* above in the sothern half. On the 27th, the temperature rose to 289*a* at several stations, and fell to 267*a* at Kilkenny on the 6th. The maximum (286*a*) recorded at Cahirciveen on the 12th was the highest January value since the Valencia Observatory was moved there in 1892.

PRECIPITATION.—Both in the North and in the South, the total rainfall for the month was above the normal, the former district having an excess of 41 mm and the latter an excess of 51 mm, the respective aggregates being 128 mm and 149 mm. The general rainfall expressed as a percentage of the normal for the whole country was 151, compared with 147 for the British Isles.

SUNSHINE.—In the North and in the South, the mean daily amount of sunshine was in close agreement with the normal. In the former district, the daily amount was 1·53 hr, and in the latter, 1·69 hr, the percentages of the length of the day from sunrise to sunset being 19 and 21 respectively.

Temperature  
Scales.

#### FEBRUARY.

Like December and January, the month was an open one, with a preponderance of south-westerly winds, much cloud, and a humid atmosphere, but was less rainy than the two months which preceded it. Snow was entirely absent and hail was rarely reported. There was also a notable absence of thunderstorms, and there were very few gales. About the 11th, floods were prevalent along the Valley of the Shannon.

TEMPERATURE.—Both in the North and in the South, the mean temperature of the month exceeded the normal; the excess in the former District was 1·7*a*, and in the latter 1·6*a*. At the individual stations, the highest daily reading recorded was 290*a* at Glasnevin and Dublin (Trinity College) on the 29th, and the lowest 267*a* at Dublin (Phoenix Park) on the 5th.

PRECIPITATION.—The aggregate rainfall for the month was 75 mm in the North, and 61 mm in the South, the former figure being normal, but the latter 24 mm in defect. Expressed as a percentage, the general rainfall was 89, compared with 112 for the whole of the British Isles.

SUNSHINE.—The mean daily amount of sunshine was a little below the normal, by 0·14 hr in the northern half of the country, and 0·35 hr. in the southern. In both districts the daily amount was slightly more than two hours.

#### MARCH.

Like the three months which preceded it, March was notable for its unusual mildness, but the weather of the month was very varied throughout. There was a marked absence of cold, drying winds, and the winds from a south-westerly quarter which predominated were frequently accompanied by copious precipitation in the form of snow, sleet, hail, and rain. Occasionally the precipitation was associated with a good deal of electrical disturbance, especially in the West.

TEMPERATURE.—The mean temperature of the month was above the normal by 0·6*a* in the northern half of the country, and by 0·5*a* in the southern half. These conditions were in great contrast with those experienced during March, 1919, when the mean temperature was below the normal by 1·9*a* in the former district, and

\* Temperature is given on the Absolute Centigrade Scale. To the nearest degree 255*a* = 0°F., 273*a* = 32°F., 280*a* = 45°F., 300*a* = 81°F., and 310*a* = 99°F.

by 1.7*a* in the latter. On the 17th the temperature rose to 290*a* at Waterford, and on the 8th, it fell to 267*a* at Lisburn.

PRECIPITATION.—The northern half of the country had 91 mm of precipitation, and the southern half 103 mm. There was an excess in both districts which amounted to 16 mm in the North, and to 23 mm in the South. The general rainfall expressed as a percentage of the normal was 129, compared with 139 over the British Isles as a whole.

SUNSHINE.—In both halves of the country the mean daily amount of sunshine was a little more than three hours and a half a day, the amount registered being normal in the north, but half an hour deficient in the South.

### THE QUARTER.

Both in the North and in the South, the mean temperature for the quarter was 0.9*a* above the normal. The rainfall also was above the normal, by 58 mm in the North, and 50 mm in the South, the respective totals being 294 mm and 313 mm. The mean daily amount of sunshine in the northern half of the country was 2.3 hr per day, and in the southern half, 2.5 hr, the former district having a very slight deficiency of 0.1 hr per day, and the latter district 0.2 hr.

TABLE VIII.—Showing the MEAN WEEKLY VALUES, and the Difference from their NORMAL VALUES of the Meteorological Elements at the Phoenix Park, Dublin,\* for the thirteen weeks ended April 3rd, 1920. Prepared at the Meteorological Office under the direction of Sir Napier Shaw, F.R.S.

NOTE.—This table has been constructed for the year 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872–1914.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872–81, 1882–91, 1892–1901, and 1902–1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911 respectively, and the population as shown by the Census in each of these years.

1915–1920.—The estimated population for each of these years has been computed as in 1914, with some additional adjustments with regard to the movements of the military

\* The Registrars' Districts (329 in number) are Sub-divisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary Districts of the same names formed under the Medical Charities Act. The letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

† The details concerning Births and Deaths in the above table for Districts marked thus (†) on pages 27 and 28 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks extending from 4th January, 1920, to 3rd April, 1920. With the exception of 154 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these districts have been assigned to the respective districts comprised in the "Dublin Registration Area" from which the deceased were admitted.

† Exclusive of 15 deaths in the Ratcliff Union Workhouse of persons admitted from Blackrock and Kingstown, to which Urban Districts they have been assigned.

ABSTRACT III.—REGISTRARS' DISTRICTS, ARRANGED BY COUNTIES AND SUPERINTENDENT REGISTRARS' DISTRICTS—continued.

**Marriages** :—JAN., FEB., MARCH, 1920.

**Births and Deaths** :—APRIL, MAY, JUNE, 1920.

During the quarter ended 30th June last, there were registered in the 832 Registrars' Districts in Ireland 27,326 births—a number equal to an annual birth-rate of 24·5 in every 1,000 of the estimated population.\* There were 18,478 deaths during the quarter, representing an annual rate of 16·5 per 1,000.

In the same period (according to the returns obtained by the Royal Irish Constabulary and the Dublin Metropolitan Police who acted as enumerators at the several Irish seaports), 4,725 persons emigrated.

In England and Wales last quarter the births registered numbered 248,665, and the deaths 119,283, the corresponding numbers for the second quarter of 1919, being 148,824 and 108,460.

The birth-rate in Ireland for the quarter is 1·3 above the average rate for the corresponding quarter of the ten years, 1910–1919, and 3·4 above the rate for the second quarter of 1919. The deaths are 2,376 below those registered in the corresponding quarter of 1919 ; the death-rate is 2·2 below the rate for that quarter, and 1·2 below the average for the second quarter of the ten years, 1910–1919.

In comparison with those for the corresponding quarter of 1919, the returns of pauperism furnished by the Local Government Board show an increase of 1,038 in the average number of Workhouse inmates on Saturdays during the quarter, and an increase of 998 in the average number of persons on out-door relief.

\* See page 76.

The annual rate (6·4 per 1,000 of the population) represented by the marriages registered during the first quarter of 1920 is 0·5 above the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each PROVINCE and COUNTY in Ireland, the Annual Rate per 1,000 of the population,\* represented by the number of MARRIAGES registered during the Quarter ended 31st March, 1920, and by the BIRTHS and DEATHS registered in the Quarter ended 30th June, 1920.

\* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry Co. and Co. Borough are calculated on the estimated population in the middle of the year 1920; those for the provinces and remaining counties on the population according to the Census of 1911.

## MARRIAGES.

The Marriages (7,202) registered in Ireland during the first quarter of 1920 are equivalent to an annual rate of 6·4 per 1,000 of the estimated population, being 0·6 above the rate for the corresponding quarter of 1919, and 0·5 above the average rate for the first quarter of the ten years, 1910–1919. Of the total number of marriages, 5,514 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,688 under the 7 and 8 Vic., cap 81; the former number being equal to an annual rate of 6·7 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 5·8 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·4 above, and that under the latter heading 1·0 above the average rate for the corresponding quarter of the previous ten years.

It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages is celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by QUARTERLY PERIODS the MARRIAGES registered in Ireland in each of the ten years, 1910–1919, and the average number for that period, also the number registered in the first quarter of 1920.

### BIRTHS.

The number of births registered during the quarter ended 30th June last was 27,326—14,060 boys and 13,266 girls—being equal to an annual ratio of 1 in every 40.9 or 24.5 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years, 1910–19, was 25,354, equivalent to an annual rate of 23.2 per 1,000 of the estimated mean population of those years.

The respective birth-rate for the four provinces \* last quarter are—Leinster, 26.5 per 1,000 of the population according to the Census of 1911; Munster, 22.6; Ulster, 27.0; and Connaught, 20.3.

### DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th June last was 18,478—9,180 males and 9,298 females—affording an annual ratio of 1 in every 60.5 or 16.5 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years, 1910–19, was 17.7 per 1,000.

The death-rate in Leinster was 18.3 per 1,000 of the population according to the Census of 1911; in Munster, 15.2; in Ulster, 18.0; and in Connaught, 14.0.

\* See note (\*) on page 64.

TABLE III.—Showing by QUARTERLY PERIODS the number of BIRTHS and DEATHS registered in Ireland in each of the ten years 1910–1919, and the average number for that period ; also the number registered during the first and second quarters of the year 1920 :—

AGES.—Of the 18,478 deaths registered last quarter, 2,348, or 12.7 per cent., were of infants under one year of age ; and 7,280, or 39.4 per cent., were of persons aged 65 years and upwards. The deaths of infants under one year old are equal to 85.9 per 1,000 of the births registered. In the Province of Leinster the number of deaths of infants under one year old equalled 15.5 per cent. of the total deaths registered therein ; in Munster, 9.7 per cent. ; in Ulster, 13.9 per cent. ; and in Connaught, 7.4 per cent. The deaths of persons 65 years old and upwards registered during the quarter in Leinster are equal to 33.7 per cent. ; in Munster to 42.7 per cent. ; in Ulster, to 38.0 per cent. ; and in Connaught to 52.2 per cent. of the total deaths registered in the province.

CAUSES OF DEATH.

As may be seen from the following Table the total number of deaths from the principal epidemic diseases is 954, and is equivalent to an annual rate of 0.85 per 1,000 living, being 273 (or 0.23 per 1,000) above the average for the second quarter of the five years preceding.

TABLE IV.—Showing the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 30th June, 1920, and in each of the eight quarters immediately preceding ; with the averages for the second quarter of the five years, 1915–1919, and the corresponding annual rates per 1,000 of the population, represented by the deaths from these causes, during the periods above referred to.

**ENTERIC FEVER.**—The deaths, which numbered 30, are below the average (55) for the corresponding period of the five years 1915–1919; in the three quarters preceding that under notice such deaths were 37, 55, and 54, respectively. Of the deaths, 5 were in Lisburn Union, 4 of which belonged to Belfast; 3 were in Dublin Union, 3 in Cork, 2 in Birr, and 2 in Killarney.

**TYPHUS.**—There were 9 deaths from typhus, as compared with an average of 12 for the second quarter. Of the deaths, 3 appertained to each of the Unions of Dublin and Caherciveen, 2 were registered in Lisburn Union, both of which belonged to Belfast, and one in Tralee.

**SMALL-POX.**—One death from small-pox of a person who came from Glasgow was registered in Enniskillen. Not one death from this disease has been registered in Ireland since the year 1907, when one death occurred. During the quarter one case of small-pox was reported from Termonfeckin and one from Coolattin.

The Registrar of Achill sends the following report: “Owing to the prevalence of small-pox in Glasgow and neighbourhood, a large number of the harvesters crossing over for the season was vaccinated by me.”

**MEASLES.**—The number of deaths from measles registered during the quarter was 173, which represents an annual death-rate of 0·15 per 1,000 of the population of Ireland estimated to the middle of the year; in each of the 3 preceding quarterly periods, deaths from measles were 23, 145, and 208. Of the total (173 deaths) 88 were registered in Dublin Union, 14 in Belfast, 12 in Londonderry, 8 in Lurgan; and 5 in Newry.

**SCARLET FEVER.**—Deaths from scarlet fever, which had declined from 166 in the December quarter of 1919 to 129 in the March quarter of 1920, further declined to 58 in the period under notice; the latter figure is above the average (44). Among the deaths, 14 were registered in Lisburn (13 belonging to Belfast County Borough), 7 were registered in Dublin Union, 4 in Newtownards, 3 in each of Donegal, Tuam and Omagh unions, and 2 in each of Clones, Downpatrick, and Inishowen unions.

**WHOOPING-COUGH.**—The mortality from whooping-cough was considerably above the average, the deaths numbering 376, the average being 202 in the corresponding quarters of the preceding 5 years. In each of the 3 preceding quarters deaths from whooping-cough were 61, 90, and 279.

Among the deaths 148 were registered in Dublin union (of which 121, equivalent to a rate of 1·52 per 1,000 of the estimated population, belonged to Dublin city), 33 in Belfast, 16 in Cork, 11 in Castleblayney, 9 in each of Tralee and Wexford, 8 in Waterford, 7 in Drogheda, and 6 in Caherciveen and Mullingar unions.

**DIPHTHERIA.**—The mortality from diphtheria which had increased from 41 deaths in the September quarter of 1919 to 114 deaths in the December quarter of 1919, and to 133 in the March quarter of 1920, declined to 99 in the period under notice, the average for the corresponding period of the past 5 years being 51. The 99 deaths registered are equivalent to a rate of 0·09 per 1,000 of the population. Of the total deaths 13 were registered in Dublin, 12 in Cork, 13 in Lisburn (10 of these belonging to Belfast) and 5 in each of the unions of Listowel and Tipperary.

**DIARRHOEAL DISEASES.**—In this group 2 deaths were caused by dysentery, and 206 by other diarrhoeal diseases; of the latter figure 155 were deaths of infants under 2 years of age. In the three preceding quarters deaths from diarrhoeal diseases (including dysentery) were 513, 288, and 168 respectively.

**INFLUENZA.**—There were 370 deaths attributed to influenza. This figure is represented by an annual death rate of 0·33 per 1,000, and is above the number registered in the March quarter by 82 deaths.

Among the 370 deaths, 110 were in Belfast, 49 in Dublin, 14 in Lisburn, 9 in each of Downpatrick, Lurgan, Newtownards, and Tuam; 8 in each of Antrim, Coleraine, and Newry; 7 in Banbridge, 6 in Bandon, and 5 in each of Castleblayney, Granard, Naas, and Waterford unions.

**TUBERCULOSIS.**—Altogether there were 2,136 deaths from all forms of tuberculosis registered, this number, which is represented by an annual rate of 1·91 per 1,000 of the estimated population, is below the average for the corresponding quarter of the 5 years preceding by 598. The deaths from all forms of tuberculosis registered in the corresponding quarterly periods in 1917, 1918, and 1919, were 2,878, 2,783, and 2,523, respectively.

**CANCER.**—The deaths from malignant disease numbered 845, as compared with 848 in the quarter preceding and 894, 867, and 835 deaths in the second quarter of the years, 1917, 1918, and 1919, respectively, and 855 in the corresponding quarter of the 5 years 1915–19.

**VIOLENCE.**—The deaths from violence numbered 276 as compared with 246 in the March quarter of the present year, and 248, 194, and 220 in the second quarter of the years, 1917, 1918, and 1919.

#### INQUESTS.

There were 312 inquests reported to the Registrars during the quarter, this number being equal to one in every 59 of the total deaths registered.

In Leinster there was one inquest to every 60 deaths registered, in Munster one to 51, in Ulster one to 55, and in Connaught one to 126.

#### DEATHS IN PUBLIC INSTITUTIONS.

Of the 18,478 deaths registered 4,022, or 21·8 per cent., occurred in public institutions. In Leinster the percentage was 29·1, in Munster 26·1, in Ulster 16·8, and in Connaught 12·0.

#### UNCERTIFIED DEATHS.

According to the returns, 4,026 of the 18,478 deaths registered during the quarter were uncertified, being 22 per cent. of the total. In Leinster the percentage was 15, in Munster 24, in Ulster 17, and in Connaught the uncertified deaths were 53 per cent, of the total deaths registered in the province.

### URBAN DISTRICTS.

#### THE QUARTER.

Table V. gives separate statistics for the Urban Districts. It will be observed that the birth-rate last quarter for these districts, which contain nearly one-third of the total population of the country, was 31·8 per 1,000 of the population, the rates for the three preceding quarters being 23·7, 27·9, and 32·2 respectively, and the average rate for the 5 years, 1915–19, being 24·4. In the remainder of the country the birth-rate was 21·5 per 1,000, as against 17·5, 17·2, and 20·5, respectively, in the three preceding quarters, and an average rate for the corresponding quarter of the previous five years of 20·8.

The annual rate represented by the deaths from all causes for the Urban Districts during the quarter was 18·7 per 1,000, as compared with 13·0, 17·2 and 20·2, respectively, for the last three quarters, and an average of 18·3 for the second quarter of the five years, 1915–19. In the remainder of the country the death-rate for the quarter was 15·9, the respective rates for the three preceding quarters being 12·3, 13·3, and 15·8, per 1,000, and the average rate for the second quarter of the five years, 1915–19, being 17·5.

For the principal epidemic diseases \* in the several Urban Districts the annual rate represented by the deaths from them during the quarter under review was 1·5 per 1,000 of the population. In the remainder of the country it was 0·5.

\* See note (†) on page 69.

URBAN DISTRICTS.

TABLE V.—BIRTHS and DEATHS registered during the SECOND QUARTER of the year 1920, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES,† from TUBERCULOUS DISEASE, and from CANCER, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the eighteen Urban Districts marked thus (\*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 3rd July, 1920.

† Enteric fever, typhus, small-pox, measles, scarlet fever, whooping-cough, diphtheria, dysentery and diarrhoeal diseases.  
‡ The rates for the Dublin Registration Area and its component parts and for Belfast and Londonderry are calculated on the estimated population in the middle of 1920.  
(a) Including two deaths from cerebro-spinal fever

VACCINATION.

According to the Returns of Primary Vaccinations received for the second quarter of the year 1920, there were 22,527 persons successfully vaccinated.

EMIGRATION.

The Returns obtained by the Royal Irish Constabulary and the Dublin Metropolitan Police, who acted as enumerators at the several Irish seaports, show that the number of emigrants who left Ireland during the quarter ended 30th June last was 4,725 (1,824 males and 2,901 females), being 3,998 more than in the corresponding quarter of the year 1919, but 2,706 below the average number for the second quarter of the ten years 1910–1919.

TABLE VI.—EMIGRATION from IRELAND during the months of April, May, and June, in 1919 and 1920 :—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Total.			
	1919.	1920.	Increase.	Decrease.	1919.	1920.	Increase.	Decrease.	1919.	1920.	Increase.	Decrease.

TOTAL, ...	301	1,824	1,523	—	426	2,901	2,475	—	727	4,725*	3,998	—

\*Including 3,484 emigrants to the United States of America, viz. :—586 in the month of April, 1,086 in May and 1,812 in June. Of 3,349 steerage passengers, 568 had their passages paid for in America,

PRICES AND PAUPERISM.

The price of the 4-lb. loaf in Dublin for last quarter was 1s. 1d. for bread delivered. In the second quarter of the year 1919 the average price, derived from returns furnished by Messrs. Boland (Limited), and by Messrs. Johnston, Mooney and O'Brien (Limited), was 9½d. and in the corresponding quarter of 1910 it was 6d.

The average price of oatmeal (1st quality) in Dublin for the quarter was 36s. 0d. per cwt. For the second quarter of the year 1919 the average price was also 36s. 0d., and for the second quarter of 1910 the average price was 14s. 3d. per cwt.

The average price per cwt. of potatoes at the Dublin Potato Market for the quarter was 12s 11d. In the second quarter of 1919 the average price was 8s. and the price for the corresponding quarter of 1910 was 3s. 4d.

The average price per cwt. of beef at the Dublin Cattle Market was 168s., as against 156s. 9d. for the second quarter of 1919, the price for the second quarter of 1910 being 67s.

The price (including cartage) of best Whitehaven coal in the City of Dublin was 76s. per ton.

The highest price of Consols at the Dublin Stock Exchange for the quarter was £50⅛, and the lowest £45⅞.

The minimum annual rate of discount charged on Irish Bills at the Bank of Ireland during the quarter was raised from 6½ per cent. to 7½ per cent on 20th April.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

TABLE VII.—Showing the AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during the quarter (13 weeks) ended 3rd July, 1920, with the average for the second quarter of the previous ten years, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR AND OUT-DOOR RELIEF.

(c) Includes New Potatoes.

NOTE.—The average prices of Oatmeal, Potatoes, and Beef given in the above Table have been kindly supplied by the Department of Agriculture and Technical Instruction for Ireland; the number of persons receiving In-door and Out-door Relief by the Local Government Board; and the prices of bread by (a) Messrs. Bolands (Limited), and (b) Messrs. Johnston, Mooney, and O'Brien (Limited).

## METEOROLOGY.\*

### APRIL.

Very generally April was dull, unsettled, and wet. Owing to the frequency with which depressions from the Atlantic passed across the country, the air pressure continued low all the month. At Malin Head, the mean pressure for the month (1002·8 mb) was the lowest ever recorded during April at that station where observations have been taken since 1885. Frequent falls of rain accompanied these cyclonic conditions and at Dublin (Fitzwilliam Square) and Birr Castle there were as many as 27 rain days, Cahirsiveen and Killarney having 26.

\* Furnished by the Director of the Meteorological Office. For further information the reader is referred to the Monthly Weather Report (Price 6d., post free 7d.) and other publications of the Meteorological Office. Maps illustrating the distribution of rainfall, pressure, temperature and sunshine are given in the Monthly Weather Report. The normal values for each month, mostly based on 35 years' observations, are shown by tables and maps in "Monthly Normals of Temperature, Rainfall, and Sunshine." (M.O. 214a, IV., 1915, Price 2s. 6d.)

*Temperature.*†—At nearly all stations, owing to a deficiency of sunshine, the days were cold, but on the other hand, the persistent cloudiness kept the nights warm, with the result that very generally the mean temperature for the month was only a little short of the normal. The 22nd and 24th were, as a rule, the warmest days, on which dates maximum temperatures of 289a and above were recorded at a number of places.

*Precipitation.*—Notwithstanding the exceptionally low mean air pressure in the North, it is noteworthy that these conditions were not associated with heavy rainfall in that locality, the total rainfall for this District being only 67mm. and only 6mm. above the normal. In the southern half of the country there was an excess of 47mm., the aggregate being 113mm. For Ireland as a whole the general rainfall expressed as a percentage of the normal was 146. At Killarney the percentage was as high as 206.

*Sunshine.*—The character of the month was reflected in the fact that both in the northern and in the southern half of the country the mean daily amount of sunshine was below the normal, the deficiency amounting to 1.22 hr. per day in the former District, and to 1.65 hr. in the latter. Good sunshine records were, however, obtained on some days, Cahirsiveen for instance, getting 11.2 hr. on the 4th and Malin Head 14.0 hr. on the 30th; but commonly these sunny conditions were only temporary and confined to limited areas.

#### MAY.

For the most part the weather of the month was dull and cool with frequent falls of rain, some stations having as many as 26 rain-days, conditions mainly due to the frequency with which atmospheric depressions passed along the western and northern sea-boards. On the 1st one of these disturbances caused a general fall of rain, and as much as 26mm was measured at Roche's Point and 20mm. at Donaghadee. On the 2nd there was a gale which was very severe in the Irish Sea, much damage being done to trees in Dublin. On the 19th in Co. Clare there was a series of hailstorms. Further heavy rains accompanied a depression on the 5th, as much as 36mm. falling at Cahirsiveen.

*Temperature.*—The mean temperature of the month was slightly in excess of the normal, but there were only a few really warm days. Commonly the hottest day was the 25th, when 299a was recorded at Killarney and 298a at Birr Castle. On the 1st at Lisburn a temperature of 271a was recorded, and 272a at Markree Castle.

*Precipitation.*—In the northern half of the country as well as in the southern the aggregate rainfall was 89mm., which in both cases yielded an excess of 25mm. At some of the individual stations the monthly totals were, however, very much larger than this. In Co. Mayo, for instance, at Aasleagh House 265mm were recorded, and 287mm. at Delphi Lodge. At Killybegs (Co. Donegal) 187mm. were measured, a total which was 265 per cent. of the normal.

*Sunshine.*—Over the northern half of the country the mean daily amount of sunshine was 4.65 hr. and in the South 5.28 hr. both Districts having a deficiency of about an hour and a quarter per day. At Seskin (Carrick-on-Suir) the daily mean was 5.90 hr. but only 3.19 hr. at Mallaranny (Co. Mayo).

#### JUNE.

A conspicuous feature of the weather in June was the notable absence of any hot days, the general character of the month being cool and showery. Only during the first ten days, which very generally, were fine and dry were the conditions at all seasonable, and at only a very few stations did the temperature on any day rise above 294a. Winds from easterly points predominated, but gales and strong winds were rare. Between the 10th and 20th thunderstorms occurred in various parts of the country, and in some instances were accompanied by very heavy rain.

† Temperature is given on the Absolute Centigrade Scale. To the nearest degree 255a=0° F., 273a=32° F., 280a=45° F., 300a=81° F., and 310a=99° F.

*Temperature.*—Notwithstanding the absence of any really warm weather the mean temperature for the month was a little above the normal, by 0·4a in the northern half of the country and by 0·1a in the southern. At the individual stations the highest temperature recorded was 296a at Killarney on the 2nd and 6th, and the lowest 273a at Clongowes Wood on the 5th. At Dublin (Fitzwilliam Square) the mean temperature for the month 287·5 was in close agreement with the normal, although the highest temperature for the month was only 293a.

*Precipitation.*—Both in the North and in the South the total rainfall for the month was below the normal, the deficiency in the former District being 10mm. and in the latter 20mm. Less than half the normal rainfall occurred locally in the North of Leinster, and less than 25mm. fell in small areas near Mullingar and Westmeath. Over Ireland as a whole the general rainfall expressed as a percentage of the normal was 78. Falls of more than 25mm. in a day were rare, among the heaviest downpours being one of 28mm. at Clongowes Wood on the 17th.

*Sunshine.*—Owing to some sunny outbursts during the first ten days the month's aggregate sunshine did not differ very much from the normal. In the North the daily mean was 5·50 hr. and in the South 6·14 hr. Commonly, the sunniest day was the 5th, when 14·5 hr. was registered at Armagh, 15·2 hr. at Clongowes Wood, and 14·7 hr. at Seskin (Carrick-on-Suir). The latter station also recorded 14·7 hr. on the 6th and Armagh 14·8 hr. on the 9th.

### THE QUARTER.

In the northern half of the country as well as in the southern the mean temperature for the Quarter was in close agreement with the normal. In both Districts, however, there was an excess of rain, which amounted to 22mm. in the North and to 56mm. in the South, the respective aggregates being 214mm. and 251mm. The sunshine, on the other hand, was below the normal, the deficiency amounting to 0·9 hr. per day in the North and to 0·8 hr. in the South.

TABLE VIII.—Showing the MEAN WEEKLY VALUES, and the Difference from their NORMAL VALUES of the Meteorological Elements at the Phoenix Park, Dublin,\* for the thirteen weeks ended July 3rd, 1920. Prepared at the Meteorological Office under the direction of Sir Napier Shaw, F.R.S.

NOTE.—This table has been constructed for the year 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872 to 1914.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, 1892-1901, and 1902-1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911 respectively, and the population as shown by the Census in each of these years.

1915 to 1920.—The estimated population for each of these years has been computed as in 1914, with some additional adjustments with regard to the movements of the military.

\*The Registrars' Districts (832 in number) are Sub-divisions<sup>7</sup> of the Unions or Superintendent Registrars' Districts, and with a few exceptions, are identical with the Dispensary Districts of the same names formed under the Medical Charities Act. The letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

+ The details concerning Births and Deaths in the above table for Districts marked thus (+) on pages 89 and 90 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks extending from 4th April, 1920, to 3rd July, 1920. With the exception of 183 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these districts have

\* Exclusive of 11 deaths in the Rathdown Union Workhouse of persons admitted from Blackrock and Kingstown, to which Urban Districts they have been assigned.

23 FORTH STREET, EDINBURGH.

*Price Ninepence Net.*

**Marriages :—**APRIL, MAY, JUNE, 1920

**Births and Deaths :—**JULY, AUGUST, SEPTEMBER, 1920.

During the quarter ended 30th September last, there were registered in the 832 Registrar's Districts in Ireland 23,473 births—a number equal to an annual birth-rate of 21·0 in every 1,000 of the estimated population.\* There were 13,988 deaths during the quarter, representing an annual rate of 12·5 per 1,000.

In the same period (according to the returns obtained by the Royal Irish Constabulary and the Dublin Metropolitan Police who acted as enumerators at the several Irish seaports), 5,605 persons emigrated.

In England and Wales last quarter the births registered numbered 229,867 and the deaths 93,690, the corresponding numbers for the third quarter of 1919 being 175,367 and 89,112.

The birth-rate in Ireland for the quarter is 0·4 below the average rate for the corresponding quarter of the ten years, 1910-19, but 1·8 above the rate for the third quarter of 1919. The deaths are 229 above those registered in the corresponding quarter of 1919 ; the death-rate is 0·2 above the rate for that quarter, but 1·2 below the average for the third quarter of the ten years, 1910-1919.

\* See page 138.

The annual rate (6·1 per 1,000 of the population) represented by the marriages registered during the second quarter of 1920 is 1·0 above the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each PROVINCE and COUNTY in Ireland, the Annual Rate per 1,000 of the population,\* represented by the number of MARRIAGES registered during the Quarter ended 30th June, 1920, and by the BIRTHS and DEATHS registered in the Quarter ended 30th September, 1920.

\* The rates for the total of Ireland and for the County Boroughs of Dublin and Belfast and Londonderry Co. and Co. Borough are calculated on the estimated population in the middle of the year 1920; those for the provinces and remaining counties on the population according to the Census of 1911.

## MARRIAGES.

The Marriages (6,756) registered in Ireland during the second quarter of 1920 are equivalent to an annual rate of 6·1 per 1,000 of the estimated population, being 0·1 above the rate for the corresponding quarter of 1919, and 1·0 above the average rate for the second quarter of the ten years, 1910–19. Of the total number of marriages, 4,602 were registered under the provisions of the 26 and 27 Vic., cap 90, and 2,154 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 5·6 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 7·4 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·8 above, and that under the latter heading 1·4 above the average rate for the corresponding quarter of the previous ten years.

It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages is celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by QUARTERLY PERIODS the MARRIAGES registered in Ireland in each of the ten years, 1910–1919, and the average number for that period, also the number registered in the first and second quarters of 1920.

### BIRTHS.

The number of births registered during the quarter ended 30th September last was 23,473—11,999 boys and 11,474 girls—being equal to an annual ratio of 1 in every 47.6 or 21.0 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years, 1910–19, was 23,486, equivalent to an annual rate of 21.4 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces \* last quarter are—Leinster, 22.5 per 1,000 of the population according to the Census of 1911; Munster, 19.9; Ulster, 23.1; and Connaught, 17.3.

### DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th September last was 13,988—6,998 males and 6,990 females—affording an annual ratio of 1 in every 79.9 or 12.5 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years, 1910–19, was 13.7 per 1,000.

The death-rate in Leinster was 13.5 per 1,000 of the population according to the Census of 1911; in Munster, 11.8; in Ulster, 13.6; and in Connaught, 10.6.

See note (\*) on page 126.

TABLE III.—Showing by QUARTERLY PERIODS the number of BIRTHS and DEATHS registered in Ireland in each of the ten years, 1910–1919, and the average number for that period ; also the number registered during the first, second and third quarters of the year 1920 :—

AGES.—Of the 13,988 deaths registered last quarter, 1,603 or 11.5 per cent., were of infants under one year of age ; and 5,445 or 38.9 per cent., were of persons aged 65 years and upwards. The deaths of infants under one year old are equal to 68.3 per 1,000 of the births registered. In the province of Leinster the number of deaths of infants under one year old equalled 13.6 per cent. of the total deaths registered therein ; in Munster, 10.0 per cent. ; in Ulster 12.2 per cent. ; and in Connaught 6.5 per cent. The deaths of persons 65 years old and upwards registered during the quarter in Leinster are equal to 34.5 per cent. ; in Munster to 40.8 per cent. ; in Ulster to 37.4 per cent. ; and in Connaught to 51.2 per cent. of the total deaths registered in the province.

CAUSES OF DEATH.

As may be seen from the following Table the total number of deaths from the principal epidemic diseases is 692, and is equivalent to an annual rate of 0.62 per 1,000 living, being 151 (or 0.15 per 1,000, below the average for the third quarter of the five years preceding.

TABLE IV.—Showing the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 30th September, 1920, and in each of the eight quarters immediately preceding ; with the averages for the third quarter of the five years, 1915–1919, and the corresponding annual rates per 1,000 of the population, represented by the deaths from these causes, during the periods above referred to.

**ENTERIC FEVER.**—There were 47 deaths from enteric fever, as compared with 55, 54 and 30 respectively in the three preceeding weeks, and an average of 53 for the third quarter of the five years, 1915–19. Ten deaths from this disease (all of these belonging to Belfast city) were registered in Lisburn Union, 5 in Tralee, 4 in Callan, 3 each in Dublin and Listowel unions, and 2 in Letterkenny.

**TYPHUS.**—Deaths from typhus which numbered 14 in the fourth quarter of 1919 fell to three in the first quarter of the present year, rising to 9 in the second quarter and to 13 in the quarter under notice, the latter being 6 above the average (7) for the third quarter of the five years, 1915–19. Of the 13 deaths, 3 occurred in Cavan Union, 3 in Tralee, 2 each in Granard and Cahersiveen, and one death each in Drogheda, Galway and Tuam unions.

**SMALL-POX.**—There was no case of this disease reported during the quarter.

**MEASLES.**—Deaths from this cause, numbering 53, are much below the numbers registered in the three preceeding quarters, viz., 145, 208, and 173, respectively, and 9 under the average (62) for the third quarter of the five years, 1915–19. Eight of the 53 deaths were registered in Limerick union and 7 in Dublin.

**SCARLET FEVER.**—To this disease 49 deaths were attributed, being one above the average for the corresponding quarter of the five preceding years. The mortality for this quarter compares favourably with that for the three preceding quarters, the deaths for the latter numbering 166, 129 and 58, respectively. Three or more deaths from scarlet fever were registered in the following unions:—Lisburn (11—all appertaining to Belfast city), Omagh (5), Donegal (3), and Magherafelt (3).

**WHOOPING-COUGH.**—The fatal cases of this disease, which numbered 90 in the fourth quarter of 1919, rose to 279 in the succeeding quarter and to 376 in the second quarter, but fell to 145 in the third quarter of this year, the latter number being, however, 10 above the average (135) for the corresponding quarter of the five years preceding.

Of the deaths during the past quarter, 32 occurred in Dublin union, 9 in Belfast 6 in Listowel, and 5 each in Cork, Naas, Tralee, and Westport.

**DIPHTHERIA.**—There were 86 deaths from diphtheria, as compared with 114, 133 and 99 in the three preceding quarters, the average for the third quarter of the preceeding five years being 50. Of the 86 deaths, 11 were registered in the union of Cork, 10 in Dublin, 7 in Lisburn (5 of these belonging to Belfast city) and 5 each in Swineford and Tipperary.

**DIARRHŒAL DISEASES.**—Of 299 deaths under this heading, 6 were attributed to dysentery and 293 to other diarrhœal diseases, the latter including the deaths of 261 children under 2 years from diarrhœa and enteritis. Deaths from diarrhœal diseases (including dysentery) in the three preceding quarters numbered 288, 168, and 208, respectively.

**INFLUENZA.**—The number of deaths returned as having been caused by influenza was 74, as compared with 82 in the first quarter and 370 in the second quarter of the year. Eight deaths were registered in Dublin union, 4 in Newtownards and 3 deaths in each of the unions of Ballinrobe, Belfast, New Ross, Newry and Strabane.

**TUBERCULOSIS.**—The deaths ascribed to tuberculosis as having been registered during the quarter numbered 1,703, being equivalent to an annual rate of 1.52 per 1,000 of the population. The 1,703 deaths are 335 under the average (2,038) for the third quarter of the preceding five years.

**CANCER.**—There were 875 deaths returned as having been caused by cancer, affording an annual rate of 0.78 per 1,000 of the estimated population. This number is 18 above the average for the third quarter of the five years, 1915–19.

**VIOLENCE.**—To violence in its various forms 309 deaths were attributed. This number is 74 above the average (235) for the five years preceding, the deaths from violence in the third quarter of the three years 1917–19, being 196, 216 and 222, respectively.

## INQUESTS.

There were 282 inquests reported to the Registrars during the quarter, this number being equal to one in every 49 of the total deaths registered.

In Leinster there was one inquest to every 56 deaths registered, in Munster one to 82, in Ulster one to 33, and in Connaught one to 162.

## DEATHS IN PUBLIC INSTITUTIONS.

Of the 13,988 deaths registered, 3,220 or 23·0 per cent. occurred in public institutions. In Leinster the percentage was 29·6, in Munster 27·0, in Ulster 19·0 and in Connaught 12·9.

## UNCERTIFIED DEATHS.

According to the returns, 3,031 of the 13,988 deaths registered during the quarter were uncertified, being 22 per cent. of the total. In Leinster the percentage was 15, in Munster 24, in Ulster 17, and in Connaught the uncertified deaths were 50 per cent. of the total deaths registered in the province.

## URBAN DISTRICTS

## THE QUARTER.

Table V. gives separate statistics for the Urban Districts. It will be observed that the birth-rate last quarter for these districts, which contain nearly one-third of the total population of the country, was 26·8 per 1,000 of the population, the rates for the three preceding quarters being 27·9, 32·2, and 31·8 respectively, and the average rate for the third quarter of the 5 years, 1915–19, being 23·0. In the remainder of the country the birth-rate was 18·8 per 1,000, as against 17·2, 20·5, and 21·5, respectively, in the three preceding quarters, and an average rate for the corresponding quarter of the previous five years of 18·7.

The annual rate represented by the deaths from all causes for the Urban Districts during the quarter was 13·7 per 1,000, as compared with 17·2, 20·2 and 18·7, respectively, for the last three quarters, and an average of 14·6 for the third quarter of the five years, 1915–19. In the remainder of the country the death-rate for the quarter was 12·3, the respective rates for the three preceding quarters being 13·3, 15·8, and 15·9, per 1,000, and the average rate for the third quarter of the five years, 1915–19, being 12·4.

For the principal epidemic diseases\* in the several Urban Districts the annual rate represented by the deaths from them during the quarter under review was 1·0 per 1,000 of the population. In the remainder of the country it was 0·4.

\* See note (†) on page 131.

## URBAN DISTRICTS.

TABLE V.—BIRTHS and DEATHS registered during the THIRD QUARTER of the year 1920, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES from TUBERCULOUS DISEASE, and from CANCER, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the eighteen Urban Districts marked thus (\*) in the following table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 2nd October, 1920.

† See note (†) on page 131.

(a) Including 10 deaths from enteric fever, 11 from scarlet fever, 5 from diphtheria, 9 from tuberculous disease, and one from diarrhoea, admitted from the City of Belfast to institutions situated in the Registrar's District of Ballylesson, in the Union of Lisburn.

## VACCINATION.

According to the returns of Primary Vaccinations received for the third quarter of the year 1920, there were 16,309 persons successfully vaccinated.

## EMIGRATION.

The Returns obtained by the Royal Irish Constabulary and the Dublin Metropolitan Police, who acted as enumerators at the several Irish seaports, show that the number of emigrants who left Ireland during the quarter ended 30th September last was 5,605 (2,171 males and 3,434 females), being 4,871 more than in the corresponding quarter of the year 1919, and 1,324 above the average number for the third quarter of the ten years, 1910–1919.

TABLE VI.—EMIGRATION from IRELAND during the months of July, August, and September, in 1919 and 1920 :—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Total.			
	1919.	1920.	In-crease.	De-crease.	1919.	1920.	In-crease.	De-crease.	1919.	1920.	In-crease.	De-crease.
July, ...	90	928	838	—	155	1,162	1,007	—	245	2,090	1,845	—
August, ...	77	643	566	—	142	1,068	926	—	219	1,711	1,492	—
September, ...	110	600	490	—	160	1,204	1,044	—	270	1,804	1,534	—
TOTAL, ...	277	2,171	1,894	—	457	3,434	2,977	—	734	5,605*	4,871	—

\* Including 4,695 emigrants to the United States of America, viz :—1,718 in the month of July, 1,428 in August and 1,549 in September. Of 4,517 steerage passengers 905 had their passages paid for in America.

## PRICES OF PROVISIONS, ETC.,

The price of the 4lb. loaf in Dublin for last quarter was 1s. 1½*d.* for bread delivered. In the third quarter of the year 1919 the average price, derived from returns furnished by Messrs. Boland (Limited), and by Messrs. Johnston, Mooney and O'Brien (Limited), was 10*d.* and in the corresponding quarter of 1910 it was 6*d.*

The average price of oatmeal (1st quality) in Dublin for the quarter was 36s. 0*d.* per cwt. For the third quarter of the year 1919 the average price was also 36s. 0*d.*, and for the third quarter of 1910 the average price was 13s. 6*d.* per cwt.

The average price per cwt. of potatoes at the Dublin Potato Market for the quarter was 11s. 4*d.* In the third quarter of 1919 the average price was 10s. 3½*d.* and the price for the corresponding quarter of 1910 was 3s. 10¼*d.*

The average price per cwt. of beef at the Dublin Cattle Market was 163s. 9*d.*, as against 136s. 6*d.* for the third quarter of 1919, the price for the third quarter of 1910 being 62s.

The price (including cartage) of best Wigan coal in the City of Dublin was 76s. per ton.

The highest price of Consols at the Dublin Stock Exchange for the quarter was £47⅔, and the lowest £45½.

The minimum annual rate of discount charged on Irish Bills at the Bank of Ireland during the quarter was 7½ per cent.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

TABLE VII.—Showing the AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during the quarter (13 weeks) ended 2nd October, 1920, with the average for the third quarter of the previous ten years.

PERIOD.		AVERAGE PRICES OF PROVISIONS.				
		BREAD. (4 lb Loaf) (delivered).		OATMEAL, (Corn Exchange), per cwt. 1st quality.	POTATOES (at Potato Market) per cwt.	BEEF. (at the Dublin Cattle Market), per Cwt.

NOTE.—The average prices of Oatmeal, Potatoes, and Beef given in the above Table have been kindly supplied by the Department of Agriculture and Technical Instruction for Ireland; and the prices of bread by (a) Messrs. Boland (Limited), and (b) Messrs. Johnston, Mooney, and O'Brien (Limited).

METEOROLOGY\*

JULY.

During July there was a notable absence of any really hot days, the general character of the month being dull, cool, and wet. There were also many windy days, with much cloud, so that insolation was diminished, with the result that the daytime temperatures were uniformly low, and at only a few stations were maxima as high as 295a recorded. On the other hand terrestrial radiation at night was retarded, so that the range of temperature was smaller than is usually the case in July.

\* Furnished by the Director of the Meteorological Office. For further information the reader is referred to the Monthly Weather Report (Price 6d., post free 7d.) and other publications of the Meteorological Office. Maps illustrating the distribution of rainfall, pressure, temperature, and sunshine are given in the Monthly Weather Report. The normal values for each month, mostly based on 35 years' observations, are shown in "The Book of Normals of Meteorological Elements for the British Isles." (M.O. 236 (Section I.), 1919, Price 2s. net.)

TEMPERATURE.†—The mean temperature of the month was below the normal both in the northern and in the southern half of the country, the deficit in both Districts being 1.1a. At Ballinacurra (Cork) the deficit was as much as 1.9a and 1.8a at Waterford. At Blacksod Point and Valencia Observatory the maximum temperature recorded during the month was only 290a, and on the 8th at Dublin (Fitzwilliam Square) the maximum was only 286a. At Clongowes Wood on the 24th a shade minimum of 277a was recorded.

PRECIPITATION.—There was an excess of rain in both halves of the country, the percentage of the normal in the North being 114 and in the South 149. At Balbriggan (Dublin) the percentage was as high as 194 and 190 at Gorey (Wexford). At Malin Head, on the other hand, the percentage was only 89. There were some heavy falls of rain on the 25th, among the heaviest being 62 mm. at Newcastle (Wicklow), 39 mm. at Mountmellick (Queen's Co.), and 38 mm. at Ranelagh (Dublin). At Roche's Point and Kilkenny there were as many as 29 rain-days.

Temperature  
Scales.

SUNSHINE.—In the northern District as well as in the southern there were four hours of sunshine per day, an amount 0.68 hr. below the normal in the one case and 1.27 hr. in the other. At Malin Head the daily mean was as high as 4.84 hr., but only 3.39 hr. at Armagh. Many sunless days were experienced, there being as many as 8 at Valencia Observatory and 5 at Birr Castle (King's Co.).

#### AUGUST.

August also was dull and cool, a prominent feature of the month's weather being the few occasions on which the maximum touched or exceeded the normal. There was also much cloud and frequent but only occasionally heavy rainfall. From the 10th to 15th anticyclonic conditions prevailed, and there was another fine spell of weather from the 20th to the close of the month.

TEMPERATURE.—Both in the northern as well as in the southern half of the country the mean temperature of the month was 1.0a below the normal. At the individual stations the highest reading recorded was 296a at Waterford on the 8th and at Killarney on the 27th; and the lowest 275a at Markree Castle on the 26th.

PRECIPITATION.—The total rainfall for the month was only 68 per cent. of the normal in the northern District and only 57 in the southern, the former District having 16 rain-days and the latter 15. At Valencia Observatory the percentage was as low as 44, but was as high as 118 at Malin Head, the excess at the latter station being due to a heavy fall of 46 mm. on the 17th, an amount also recorded on the same date at Dunfanaghy (Donegal).

SUNSHINE.—The mean daily amount of sunshine was below the normal by 0.96 hr. per day in the northern half of the country, and by 1.14 hr. in the southern, the former District having 3.33 hr. per day and the latter 3.83 hr. At the Phoenix Park the daily mean was 4.32 hr., but only 2.61 hr. at Mallaranny (Mayo).

#### SEPTEMBER.

Although changeable weather prevailed during the first half of the month September was a favourable month with some very sunny days and a mean temperature which did not differ very greatly from the normal. Occasionally the day-time temperature rose to 295a, but there were relapses from these pleasant conditions and on the 20th and 21st the maximum at some stations was only 285a, the period from the 16th to the 24th being generally cold.

† Temperature is given on the Absolute Centigrade Scale. To the nearest degree 255a=0° F., 273a=32° F., 280a=45° F., 300a=81° F., and 310a=99° F.

TEMPERATURE.—The mean temperature of the month was 0·3a above the normal in the North as well as in the South. At the individual stations the highest reading recorded was 296a at Glasnevin on the 25th, and the lowest 272a at Markree Castle on the 22nd. At Roche's Point on the 26th the minimum was only 287a, and only 288a at Valencia Observatory on the 27th.

PRECIPITATION.—In the northern half of the country the aggregate rainfall for the month (83 mm.) was 8 mm. above the normal and in the southern half (64 mm.) 7 mm. below. In the south-east portion of the country there was less than 50 mm., but more than 150 mm. in Connemara and Kerry. For Ireland as a whole the general rainfall expressed as a percentage of the normal was 85.

SUNSHINE.—The mean daily amount of sunshine in the North was 3·67 hour per day and in the South 4·16 hour, both amounts being below the normal, the former by 0·18 hr. per day and the latter by 0·29 hr. The sunniest week was that which ended on the 25th.

THE QUARTER.

The mean temperature, the aggregate rainfall, and the mean daily amount of sunshine were all below the normal, the temperature by 0·5a, the rainfall by about 10 mm., and the daily sunshine by 0·6 hr. per day in the northern District and 0·9 hr. in the southern.

TABLE VIII.—Showing the MEAN WEEKLY VALUES, and the Difference from their NORMAL VALUES of the Meteorological Elements at the Phoenix Park, Dublin,\* for the thirteen weeks ended October 2nd, 1920.

NOTE.—This table has been constructed for the year 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872 to 1914.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, 1892-1901, and 1902-1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911 respectively, and the population as shown by the Census in each of these years.

1915 to 1920.—The estimated population for each of these years has been computed as in 1914, with some additional adjustments with regard to the movements of the military.

[illegible]

\*The Registrars' Districts (832 in number) are Sub-divisions of the Unions or Superintendent Registrars' Districts, and with a few exceptions, are identical with the Dispensary Districts of the same names formed under the Medical Charities Act. The letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

† The details concerning Births and Deaths in the above table for Districts marked thus (†) on pages 151 and 152 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks extending from 4th July, 1920, to 2nd October, 1920. With the exception of 152 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these districts have been assigned to the respective districts comprised in the "Dublin Registration Area" from which the deceased were admitted.

† Exclusive of 3 deaths in the Rathdown Union Workhouse of persons admitted from Blackrock and Kingstown, to which Urban Districts they have been assigned.

(a) See Note (†) on page 141.

**Marriages :—**JULY, AUGUST, SEPT, 1920.    **Births and Deaths :—**OCTOBER, NOVEMBER, DECEMBER, 1920

---

During the quarter ended 31st December last, there were registered in the 832 Registrar's Districts in Ireland 21,782 births—a number equal to an annual birth-rate of 19·5 in every 1,000 of the estimated population.\* There were 15,435 deaths during the quarter, representing an annual rate of 13·8 per 1,000.

In the same period (according to the returns obtained by the Royal Irish Constabulary and the Dublin Metropolitan Police who acted as enumerators at the several Irish seaports), 3,786 persons emigrated.

In England and Wales last quarter the births registered numbered 208,380 (or 22·0 per 1,000 of the total population), and the deaths 115,603, affording an annual rate of 12·5 per 1,000 of the home population.

The birth-rate in Ireland for the quarter is 0·8 below the average rate for the corresponding quarter of the ten years 1910-19, and 0·7 below the rate for the fourth quarter of 1919. The deaths are 448 below those registered in the corresponding quarter of 1919 ; the death-rate is 0·4 below the rate for that quarter, and 2·4 below the average for the fourth quarter of the ten years, 1910-19.

\* See page 203.

The annual rate (6·1 per 1,000 of the population) represented by the marriages registered during the third quarter of 1920 is 0·9 above the average rate for the corresponding quarter of the preceding ten years.

\* The rates for the total of Ireland and for the County Boroughs of Dublin and Belfast and Londonderry Co. and Co. Borough are calculated on the estimated population in the middle of the year 1920; those for the provinces and remaining counties on the population according to the Census of 1911.

### MARRIAGES.

The Marriages (6,774) registered in Ireland during the third quarter of 1920 are equivalent to an annual rate of 6·1 per 1,000 of the estimated population, being 0·5 below the rate for the corresponding quarter of 1919, but 0·9 above the average rate for the third quarter of the ten years, 1910-19. Of the total number of marriages, 4,461 were registered under the provisions of the 26 and 27 Vic., cap 90, and 2,313 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 5·4 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 7·9 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·7 above, and that under the latter heading 1·4 above the average rate for the corresponding quarter of the previous ten years.

It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages is celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by QUARTERLY PERIODS the MARRIAGES registered in Ireland in each of the ten years, 1910-19, and the average number for that period also the number registered in the first, second, and third quarters of 1920.

### BIRTHS.

The number of births registered during the quarter ended 31st December last was 21,782—11,219 boys and 10,563 girls—being equal to an annual ratio of 1 in every 51.3 or 19.5 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years, 1910-19, was 22,253, equivalent to an annual rate of 20.3 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces\* last quarter are—Leinster, 20.1 per 1,000 of the population according to the Census of 1911 ; Munster, 18.3 ; Ulster, 22.2 ; and Connaught, 15.9.

### DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st December last was 15,445—7,706 males and 7,739 females—affording an annual ratio of 1 in every 72.4 or 13.8 per 1,000 of the estimated population ; the average rate for the corresponding quarter of the ten years, 1910-19, was 16.2 per 1,000.

The death-rate in Leinster was 15.7 per 1,000 of the population according to the Census of 1911 ; in Munster, 13.1 ; in Ulster, 14.5 ; and in Connaught, 11.5.

\* See note (\*) on page 188.

TABLE III.—Showing by QUARTERLY PERIODS the number of BIRTHS and DEATHS registered in Ireland in each of the ten years, 1910-1919, and the average number for that period ; also the number registered during each quarter of the year 1920 :—

AGES—Of the 15,445 deaths registered last quarter, 1,806, or 11.7 per cent., were of infants under one year of age ; and 6,483, or 42.0 per cent., were of persons aged 65 years and upwards. The deaths of infants under one year old are equal to 82.9 per 1,000 of the births registered. In the province of Leinster the number of deaths of infants under one year old equalled 14.6 per cent. of the total deaths registered therein ; in Munster, 9.7 per cent. ; in Ulster 12.0 per cent. ; and in Connaught 6.8 per cent. The deaths of persons 65 years old and upwards registered during the quarter in Leinster are equal to 36.9 per cent. ; in Munster to 43.0 per cent. ; in Ulster to 41.7 per cent. ; and in Connaught to 54.0 per cent, of the total deaths registered in the province.

CAUSES OF DEATH.

As may be seen from the following Table the total number of deaths from the principal epidemic diseases is 802, and is equivalent to an annual rate of 0.72 per 1,000 living, being 40 (or 0.02 per 1,000) above the average for the fourth quarter of the five years preceding.

TABLE IV.—Showing the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 31st December, 1920, and in each of the eight quarters immediately preceding ; with the averages for the fourth quarter of the five years, 1915-1919, and the corresponding annual rates per 1,000 of the population, represented by the deaths from these causes, during the periods above referred to.

**ENTERIC FEVER.**—To this cause 76 deaths were attributed, being 10 above the average (66) for the fourth quarter of the five years, 1915-19, and also above the mortality for any of the first three quarters of 1920, the deaths for these periods numbering 54, 30, and 47, respectively. Of the 76 deaths, 18 occurred in the union of Cork, 7 in Skibbereen, 6 in Lisburn (4 of these belonging to Belfast city), 5 in Dublin union, 4 in Newcastle, 3 in Loughrea, and 2 each in Ballina, Ballymahon, Belfast, Coleraine, Mullingar, and Tralee unions.

**TYPHUS.**—Twenty-five deaths from typhus were recorded, as against 3, 9, and 13 in the three preceding quarters, and an average of 8 for the fourth quarter of the five years 1915-19.

In the union of Dublin 8 deaths were registered; in Belfast, 5; in Granard, 2; in Lisburn, 2 (both appertaining to Belfast city); in Skibbereen, 2; and in Ballina, Castlebar, Dingle, Killarney, Londonderry, and Newcastle, one death each.

**SMALL-POX.**—No case of this disease was reported.

**MEASLES.**—The deaths from measles numbered 34, or 68 under the average (102) for the corresponding quarter of the five years preceding, the numbers for the first three quarters of the year being 208, 173, and 53, respectively. Of the 34 deaths, 4 occurred in each of the unions of Ballina and Banbridge.

**SCARLET FEVER.**—There were 67 deaths from this disease, the average for the fourth quarter of the past five years being 80, and the numbers for the first, second, and third quarters of 1920 amounting to 129, 58, and 49. Of the 67 deaths 21 were registered in Lisburn union (17 of the latter appertaining to Belfast city), 6 in Downpatrick, 5 in Londonderry, 4 in Dublin, and 3 each in Cookstown and Rathdrum.

**WHOOPING-COUGH.**—The fatal cases of this disease numbered 112, being equal to 0.10 per 1,000 of the population; in the three preceding quarters, deaths from whooping-cough numbered 279, 376, and 145, respectively, the average for the fourth quarter of the five years, 1915-19, being 119.

Twenty-one of the 112 deaths occurred in Dublin union, 8 in Belfast, and 5 in Rathdrum.

**DIPHTHERIA.**—The deaths from diphtheria during the fourth quarter of the year 1920, numbering 179, afford an annual rate of 0.16 per 1,000 of the estimated population. This mortality is the highest yet recorded in Ireland for any quarter, the next highest number being 173 in the fourth quarter of the year 1874. Of the 179 deaths, 34 (or 1.01 per 1,000 of the population) occurred in Cork union, 19 in Dublin, 18 in Lisburn (14 appertaining to Belfast city), 8 in Limerick, and 6 in Londonderry, the deaths recorded in these five unions amounting to 85, or about 48 per cent, of the total deaths from diphtheria registered in Ireland during the quarter. These deaths are 95 above the average (84) for the corresponding quarter of the preceding five years, the deaths in the first three quarters of 1920 numbering 133, 99, and 86, respectively.

It will be seen that the number of deaths from this cause registered during this year was 497, being equal to 0.11 per 1,000 of the estimated population. It is the highest number of deaths from this disease recorded in any one year since 1874, during which 565 deaths were registered, the ratio to the population being the same as that for the year 1920, viz., 0.11 per 1,000.

**DIARRHOEAL DISEASES.**—Of 309 deaths from diarrhoeal diseases registered during the quarter, 2 were from dysentery, and 268 from diarrhoea and enteritis of children under 2 years of age. In the three preceding quarters deaths from diarrhoeal diseases (including dysentery) amounted to 168, 208, and 299, respectively.

**INFLUENZA.**—To this cause 91 deaths were assigned, as compared with 82, 370, and 74 in the three quarters preceding. Of 91 deaths, 15 occurred in Dublin union, 10 in Kanturk, 9 in Belfast, and 5 in Dungarvan..

**TUBERCULOSIS.**—During the quarter, deaths from tuberculosis numbered 1,564 (equivalent to an annual rate of 1.40 per 1,000 of the population) and are 309 (or 16.4 per cent.) under the average (1,873) for the fourth quarter of the five years, 1915-19.

**CANCER.**—There were 863 deaths from this cause, affording an annual rate of 0.77 per 1,000 of the population; and as compared with the average (898) these deaths show a decrease of 35.

**VIOLENCE.**—To this heading 404 deaths were assigned, as against 246, 276, and 309, respectively, in the quarters preceding, and an average of 287 for the fourth quarter of the five years, 1915-19.

## INQUESTS.

There were 359 inquests reported to the Registrars during the quarter, this number being equal to one in every 43 of the total deaths registered.

In Leinster there was one inquest to every 38 deaths registered, in Munster one to 45, in Ulster one to 41, and in Connaught one to 80.

## DEATHS IN PUBLIC INSTITUTIONS.

Of the 15,445 deaths registered, 3,485, or 22·6 per cent., occurred in public institutions. In Leinster the percentage was 28·9, in Munster, 26·9, in Ulster, 17·0, and in Connaught, 15·9.

## UNCERTIFIED DEATHS.

According to the returns, 3,521 of the 15,445 deaths registered during the quarter were uncertified, being 23 per cent. of the total. In Leinster the percentage was 17, in Munster, 26, in Ulster 18, and in Connaught the uncertified deaths were 49 per cent. of the total deaths registered in the province.

## URBAN DISTRICTS.

## THE QUARTER.

Table V. gives separate statistics for the Urban Districts. It will be observed that the birth-rate last quarter for these districts, which contain nearly one-third of the total population of the country, was 24·4 per 1,000 of the population, the rates for the three preceding quarters being 32·2, 31·8, and 26·8, respectively, and the average rate for the fourth quarter of the 5 years, 1915-19, being 22·0. In the remainder of the country the birth-rate was 17·6 per 1,000, as against 20·5, 21·5, and 18·8, respectively, in the three preceding quarters, and an average rate for the corresponding quarter of the previous five years of 17·7.

The annual rate represented by the deaths from all causes for the Urban Districts during the quarter was 15·8 per 1,000, as compared with 20·2, 18·7, and 13·7, respectively, for the last three quarters, and an average of 19·5 for the fourth quarter of the five years, 1915-19. In the remainder of the country the death-rate for the quarter was 13·3, the respective rates for the three preceding quarters being 15·8, 15·9, and 12·3, per 1,000, and the average rate for the fourth quarter of the five years, 1915-19, being 15·4.

For the principal epidemic diseases\* in the several Urban Districts the annual rate represented by the deaths from them during the quarter under review was 1·2 per 1,000 of the population. In the remainder of the country it was 0·5.

## THE YEAR 1920.

It will be seen from Table VI. that the rate represented by the number of births registered in the Urban Districts of Ireland during the year 1920 was 28·2 per 1,000 of the population, as compared with 21·6, 22·0, and 24·0, respectively, in the three preceding years.

For the Rural Districts the birth rate in 1920 was 19·9, the birth rates for the three years 1917-19 being 18·8, 19·0, and 18·7.

In the Urban Districts the death rate from all causes was 17·1 per 1,000, as against 17·2, 21·4, and 19·2 in the three years preceding. In the remainder of the country the death rate from all causes was 14·3 per 1,000, as compared with 16·3, 16·2, and 17·3 in the three years 1917-19.

For the principal epidemic diseases\* in 1920, the rate in the Urban Districts per 1,000 of the population was 1·4, and in the Rural Districts it was 0·5 per 1,000.

The Infant mortality rate for the Urban Districts, based on the Births and Deaths of Infants under one year of age registered during the year 1920, as returned by the Registrars, was 114 per 1,000 Births, the rate for the Rural Districts being only 60 per 1,000.

\* See note (†) on page 193

URBAN DISTRICTS.

TABLE V.—BIRTHS and DEATHS registered during the FOURTH QUARTER of the year 1920, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES† from TUBERCULOUS DISEASE, and from CANCER, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the eighteen Urban Districts marked thus (\*) in the following table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 1st January, 1921.

† Enteric fever, typhus, small-pox, measles, scarlet fever, whooping-cough, diphtheria, dysentery, and diarrhoeal diseases.

‡ The rates for the total of Ireland, and for the Dublin Registration Area and its component parts, and for Belfast and Londonderry are calculated on the estimated population in the middle of 1920.

(a) The births in the Dublin Registration Area given above are corrected for those occurring in Institutions.

(b) Including 6 deaths from cerebro-spinal fever.

(c) Including 31 deaths from enteric fever, 4 from typhus, 3 from measles, 63 from scarlet fever, 36 from diphtheria, 5 from influenza, 43 from tuberculous disease, one from cancer, and 2 from diarrhoea, admitted from the City of Belfast to institutions situated in the Registrar's District of Ballylessoon, in the Union of Lisburn, and 4 deaths from cerebro-spinal fever registered in Belfast.

## VACCINATION.

According to the returns of Primary Vaccinations received for the fourth quarter of the year 1920, there were 12,249 persons successfully vaccinated.

## EMIGRATION.

The Returns obtained by the Royal Irish Constabulary and the Dublin Metropolitan Police, who acted as enumerators at the several Irish seaports, show that the number of emigrants who left Ireland during the quarter ended 31st December last was 3,786 (1,450 males and 2,336 females), being 2,651 more than in the corresponding quarter of the year 1919, and 875 above the average number for the fourth quarter of the ten years, 1910-1919.

TABLE VII.—EMIGRATION from IRELAND during the months of October, November, and December, in 1919 and 1920.

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Total.			
	1919.	1920.	In-crease.	De-crease.	1919.	1920.	In-crease.	De-crease.	1919.	1920.	In-crease.	De-crease.

TOTAL, ...	418	1,450	1,032	—	717	2,336	1,619	—	1,135	3,786*	2,651	—

\* Including 3,205 emigrants to the United States of America, viz :—796 in the month of October, 1,499 in November, and 910 in December. Of 3,052 steerage passengers 638 had their passages paid for in America.

## PRICES OF PROVISIONS, ETC.

The price of the 4lb. loaf in Dublin for last quarter was 1s. 5¼d. for bread delivered. In the fourth quarter of the year 1919 the average price, derived from returns furnished by Messrs. Boland (Limited), and by Messrs. Johnston, Mooney, and O'Brien (Limited), was 10d., and in the corresponding quarter of 1910 it was 6d.

The average price of oatmeal (1st quality) in Dublin for the quarter was 38s. 6d. per cwt. For the fourth quarter of the year 1919 the average price was 36s. 0d., and for the fourth quarter of 1910 the average price was 13s. 6d. per cwt.

The average price per cwt. of potatoes at the Dublin Potato Market for the quarter was 10s. 1d. In the fourth quarter of 1919 the average price was 7s. 8d. and the price for the corresponding quarter of 1910 was 3s. 5¾d.

The average price per cwt. of beef at the Dublin Cattle Market was 159s. 3d. as against 133s. 6d. for the fourth quarter of 1919, the price for the fourth quarter of 1910 being 56s. 3d.

The price (including cartage) of best Wigan coal in the City of Dublin was 78s. per ton.

The highest price of Consols at the Dublin Stock Exchange for the quarter was £46 <sup>5</sup>/<sub>16</sub>, and the lowest £43 <sup>5</sup>/<sub>8</sub>.

The minimum annual rate of discount charged on Irish Bills at the Bank of Ireland during the quarter was 7½ per cent.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

TABLE VIII.—Showing the AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during the quarter (13 weeks) ended 1st January, 1921, with the average for the fourth quarter of the previous ten years.

NOTE.—The average prices of Oatmeal, Potatoes, and Beef given in the above Table have been kindly supplied by the Department of Agriculture and Technical Instruction for Ireland; and the prices of bread by (a) Messrs. Boland (Limited), and (b) Messrs. Johnston, Mooney, and O'Brien (Limited).

METEOROLOGY \*

OCTOBER.

The most conspicuous feature of the weather in Ireland during October was the very heavy rainfall. There was, moreover, much fog and mist, and only from the 20th to the 29th, when very generally there was an absence of rain, was there much sunshine. Winds from between South and East moreover preponderated, those from a south-west quarter being remarkably rare. Early on the morning of the 3rd there was a severe gale in the south of Ireland and especially in Cork Harbour, where much damage was done to wharves and shipping.

\* Furnished by the Director of the Meteorological Office. For further information the reader is referred to the Monthly Weather Report (Price 6d., post free 7d.) and other publications of the Meteorological Office. Maps illustrating the distribution of rainfall, pressure, temperature, and sunshine are given in the Monthly Weather Report. The normal values for each month, mostly based on 35 years' observations, are shown in "The Book of Normals of Meteorological Elements for the British Isles." (M.O. 236 (Section I.), 1919, Price 2s. net.)

TEMPERATURE †---The mean temperature of the month was above the normal by 2·0a in the northern District and by 1·8a in the southern. This was the seventh month during the present year in which both Districts exceeded the normal, the other six months being January, February, March, May, June and September. In April, July and August the mean in both districts was below the normal. Of the temperature recorded at individual stations during October the highest was 29·3a at Baldonnell (Dublin) and Killarney on the 9th, and the lowest 27·0a at the Phoenix Park on the 28th.

PRECIPITATION.—There was an excess of rain in both halves of the country, the percentage of the normal in the North being 122 and in the South 146. At Gorey (Wexford) the percentage was 222 and at Waterford (Brook Lodge) 200, only two wetter Octobers having been recorded at the latter station since 1850. On the other hand the percentage at Killybegs (Donegal) was as low as 27. Generally speaking, the total fall was below 75mm only in the West, but nearly the whole of the East coast had more than 150mm. The percentage of the normal for Ireland as a whole was 127.

Temperature Scales.

SUNSHINE.—In the northern District as well as in the southern there were 2·9 hours of sunshine per day, an amount equal to the normal in one case and 0·3 hours below in the other. At Valencia Observatory there was only one day during the month with as much as six hours sunshine, compared with nine such days at the Phoenix Park.

#### NOVEMBER.

During the greater part of November there was a preponderance of winds from a south-westerly quarter, with the result that very generally in Ireland the weather was mild and rainy. There was very little frost, a notable feature of the month being the very striking contrast it presented to the very cold November of 1919. At Dublin (Fitzwilliam Square) for instance, the mean maximum was 28·4·8a compared with 28·0·2a last year; and the mean minimum 27·9·9a compared with 27·4·7a in 1919. At Killarney the mean temperature this November was 28·3·1a (2·4a above the normal) compared with 27·7·1a (3·6a below the normal) last year.

TEMPERATURE.—In the northern half of Ireland the mean temperature of the month was 2·0a above the normal, and in the southern half there was an excess of 1·8a. This being the eighth month this year in which both Districts exceeded the normal. The highest temperature recorded during the month was 29·0a at Killarney on the 15th, and the lowest 27·0a at Ballinacurra (Cork) on the 17th, at Glasnevin on the 23rd, and at Markree Castle (Sligo) on the 29th.

PRECIPITATION.—There were 21 rain-days in the North and in the South, the mean monthly total in both Districts (97 mm) differing only a little from the normal. In the western parts of the country there was very heavy rain on some of the days, 43mm, for instance, falling at Mallaranny on the 7th, 40mm at Blacksod Point on the 18th, and 28mm at Valencia Observatory on the 30th, with the result that the total fall for the month in the West was in excess of the normal. The percentage of the normal for Ireland as a whole was 110.

SUNSHINE.—Sunshine was deficient by 0·91 hour per day in the northern District and by 0·60 hour in the southern, the former district having 1·04 hour per day and the latter 1·61 hour. At Baldonnell (Dublin) the daily mean was 1·83 hour, but only 0·97 at Markree Castle (Sligo), the percentages of the possible duration being 21 and 11 respectively.

#### DECEMBER.

The first four days of December were very mild, and at some of the stations the temperature rose as high as 28·7a. After this the weather for two weeks was cold, and on the 14th and 15th temperatures as low as 26·5a were recorded. The last two weeks were damp, unsettled, and mild, and on Christmas Day maximum temperatures as high as 28·7a were again recorded, the mean temperature for this day at Dublin (Fitzwilliam Square) being 28·4·4a, a figure about 6·7a above the normal.

† Temperature is given on the Absolute Centigrade Scale. To the nearest degree 25·5a=0° F., 27·3a=32° F., 28·0a=45° F., 30·0a=81° F., and 31·0a=99° F.

TEMPERATURE.—The mean temperature of the month in the northern half of the country did not differ much from the normal, but in the southern half there was a deficiency of warmth amounting to 0·8a. Ground frosts were numerous, and some stations reported as many as sixteen.

PRECIPITATION.—Both in the North and in the South the total rainfall for the month was 13mm below the normal; the aggregate in the former District was 90mm and in the latter 106. In both Districts there were 19 rain-days. At Mallaranny (Mayo) on the 1st there was a downpour of 30mm and 25mm at Dunfanaghy (Donegal) on the 2nd. The percentage of the monthly normal for the whole of Ireland was 97.

SUNSHINE.—The mean daily amount of sunshine was above the normal by 0·45 hour in the North and by 0·23 hour in the South; the daily mean in one case was 1·65 hours and in the other 1·70 hours. At Malin Head the daily mean was as high as 1·97 hours, compared with only 0·77 hour at Dublin (Trinity College).

THE QUARTER.

The mean temperature for the quarter was above the normal by 1·3a in the northern half of Ireland and by 1·1a in the southern. The total rainfall for the Quarter was also above the normal, the former District having an excess of 9mm and the latter 29mm. The mean daily amount of sunshine, on the other hand, was below the normal, the North having a daily deficiency of 0·1 hour and the South 0·2 hour. In the North the daily mean was 1·9 hour and in the South 2·1 hour.

TABLE IX.—Showing the MEAN WEEKLY VALUES and the difference from their NORMAL VALUES of the Meteorological Elements at the Phoenix Park, Dublin \* for the thirteen weeks ended January 1st, 1921.

NOTE.—This table has been constructed for the year 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872 to 1914.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, 1892-1901, and 1902-1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911 respectively, and the population as shown by the Census in each of these years.

1915 to 1920.—The estimated population for each of these years has been computed as in 1914, with some additional adjustments with regard to the movements of the military.

**MARRIAGES** Registered during the Quarter ending 30th September, 1920, in PROVINCES, COUNTIES, and SUPERINTENDENT REGISTRARS' DISTRICTS (or POOR LAW UNIONS) of IRELAND ; **BIRTHS AND DEATHS** Registered during the Quarter ending 31st December, 1920 ; Deaths from ENTERIC FEVER, TYPHUS, SMALL-POX, MEASLES, SCARLET FEVER, WHOOPING-COUGH, DIPHTHERIA, DYSENTERY, INFLUENZA, TUBERCULOUS DISEASE, CANCER, DIARRHŒA AND ENTERITIS OF CHILDREN under 2 years, DIARRHŒA OF PERSONS aged 2 years and upwards ; also VIOLENT DEATHS,\* INQUEST CASES, DEATHS IN PUBLIC INSTITUTIONS, and NUMBER OF UNCERTIFIED DEATHS Registered during the Quarter ending 31st December, 1920, in the PROVINCES, COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and REGISTRARS' DISTRICTS OF IRELAND ; with a Return of **VACCINATIONS** for that Quarter.

ABSTRACT I.—PROVINCES AND COUNTIES.

PROVINCES and COUNTIES.	Area in Statute Acres.	Popula- tion in 1911.	Marriages.		Births.		Deaths.		The Deaths registered during the Quarter are stated by the Registrars to include															Number of successful Vaccinations in the Quarter ending 31st Dec., 1920.					
			Averages in the Quarters ending 30th Sept., 1920. 10 years, 1910-1919.		Registered in the Quarter ending 31st Dec., 1920.		Averages in the Quarters ending 31st Dec., 1919. 10 years, 1910-1919.		Registered in the Quarter ending 31st Dec., 1920.		Deaths from																		
											Deaths of																		
											Persons aged 65 years and upwards.	Infants under 1 year of age.	Enteric Fever.	Typhus.	Small-pox.	Measles.	Scarlet Fever.	Whooping-cough.	Diphtheria.	Dysentery.	Influenza.	Tuberculous Disease.	Cancer.	Diarrhoea and Enteri- tis of Children under 2 years of age.	Diarrhoea, 2 years of age and upwards.	Violence.

[illegible]

\*The Registrars' Districts (832 in number) are Sub-divisions of the Unions or Superintendent Registrars' Districts, and with a few exceptions, are identical with the Dispensary Districts of the same names formed under the Medical Charities Act. The letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

† The details concerning Births and Deaths in the above table for Districts marked thus (†) on pages 213 and 214 are taken from the Registrar's Districts.

extending from 3rd October, 1920 to 1st January, 1921. With the exception of 197 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these districts have been assigned to the respective districts comprised in the "Dublin Registration Area," from which the deceased were admitted.

mitted from Blackrock and Kingstown, to which Urban Districts they have been assigned.

(a) See Note (†) on page 204b.

\* The boundaries of Belfast Urban, Nos. 11, 12, and 13 districts, were altered as from 1st April, and a new district (No. 16) formed. The population of each of these districts is not available.  
The population (Census 1911) of the four districts is 100,620.
